

Server 2022 Users/Groups and NTFS Permissions

The purpose of this worksheet is to assist you in creating Users and Groups on the server. You will then use these Users and Groups as directed to demonstrate NTFS folder permissions.

Instructions

1. Create the following Organizational Units (OUs), Users, and Groups on your Server 2022 VM.
 - a. You may assign them all the same password. Make it so the password never expires.
 - b. Because each of you will be working with the same server you will need to create unique OUs, Users, and Groups. One way to do this is to put your first name **[fname]** where indicated.

Organizational Units
Name
[fname] Sales Users
[fname] Marketing Users
[fname] Managers

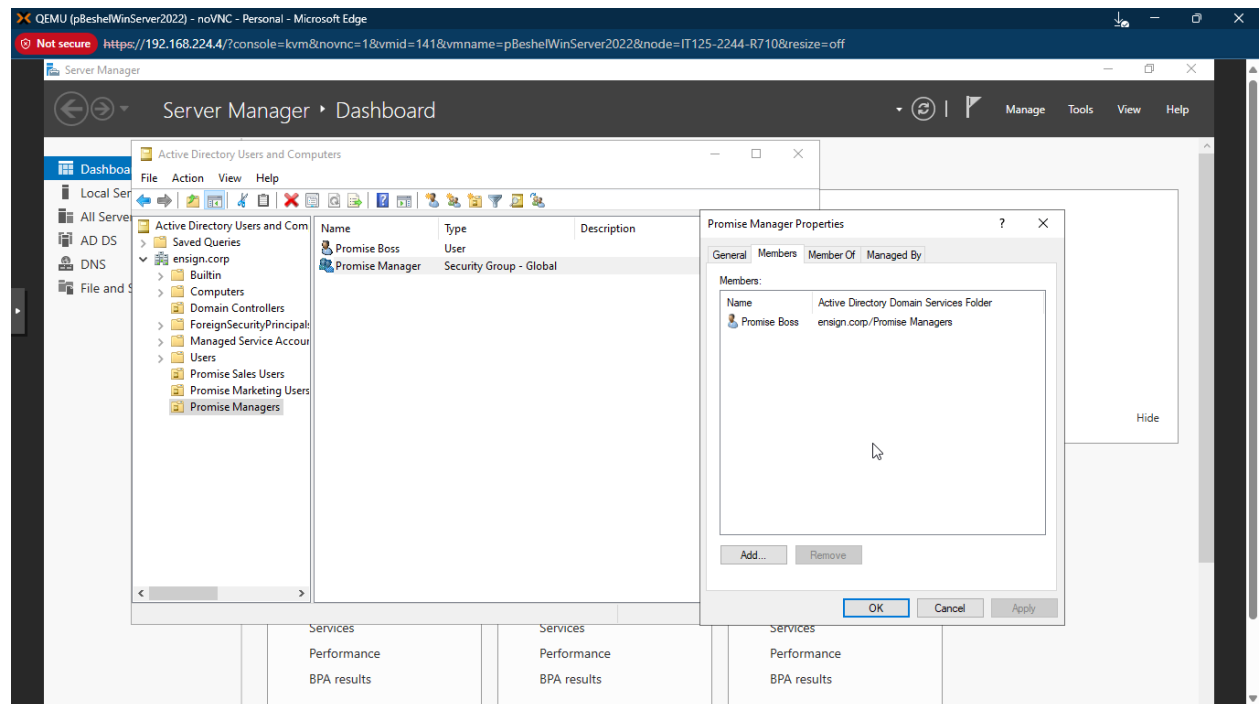

Users			
Name	Username	OU	Password
[fname] Boss	[fname]Boss	[fname] Managers	MSPress#1
[fname] Salesbody	[fname]Salesbody	[fname] Sales Users	MSPress#1
[fname] Marketer	[fname]Marketer	[fname] Marketing Users	MSPress#1

Groups			
Name	Type	Members	OU
[fname] Manager	Global Security	[fname]Boss	[fname] Managers
[fname] Sales	Global Security	[fname]Salesbody; [fname] Manager	[fname] Sales Users
[fname] Marketing	Global Security	[fname]Marketer; [fname] Manager	[fname] Marketing Users

2. **Take the following screenshots (or snips) and paste them below each description.** The screenshots or snips will show the created OUs, the groups, and the members of each group as follows:

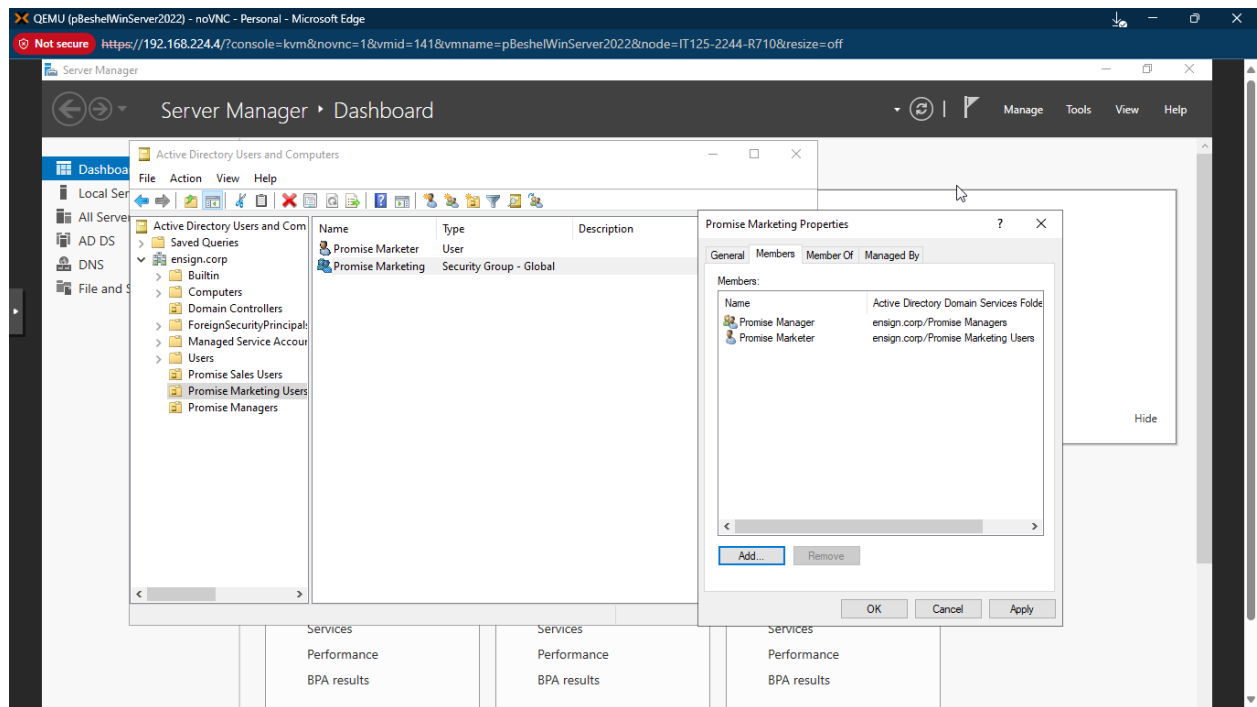

- a. **[fname] Managers** OU showing **[fname] Manager Security Group** and **[fname] Boss** User. Ensure **[fname] Boss** is a member of the **[fname] Manager** Group.

Paste screenshot here:

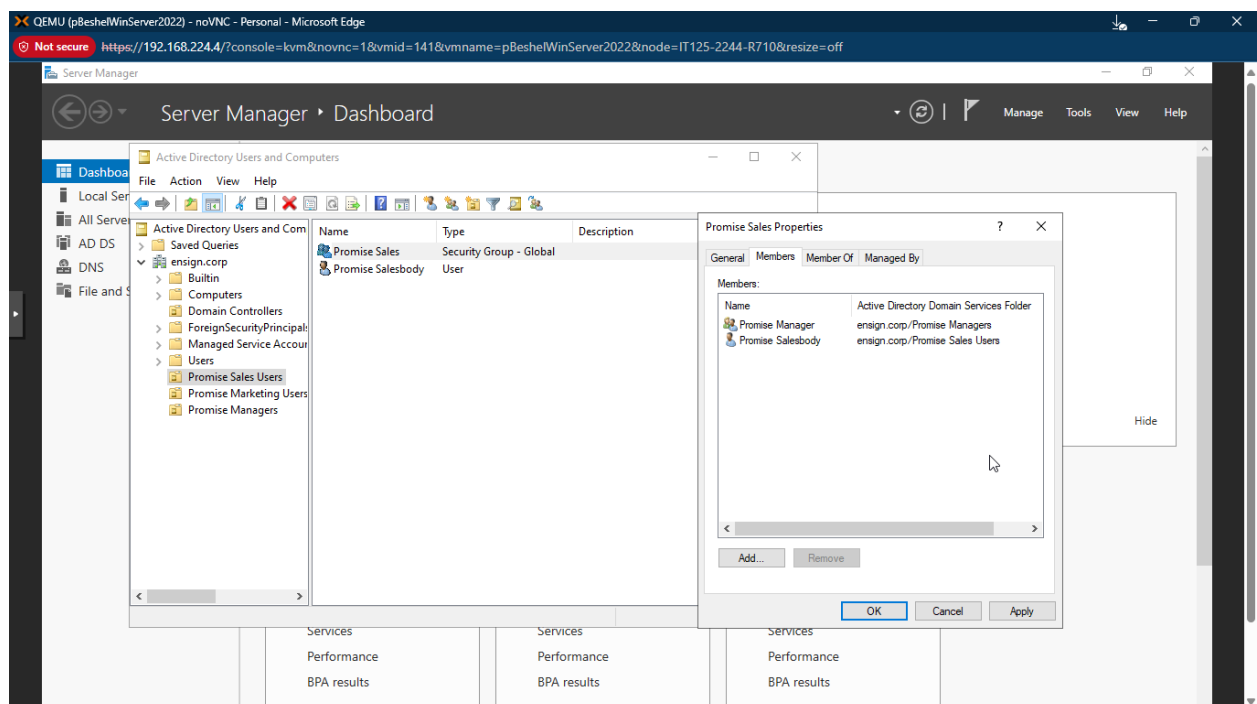

- b. **[fname] Marketing** Users OU showing **[fname] Marketing Security Group** and **[fname] Marketer** User. Ensure **[fname] Marketer** is a member of the **[fname] Marketing** Group.

Paste screenshot here:

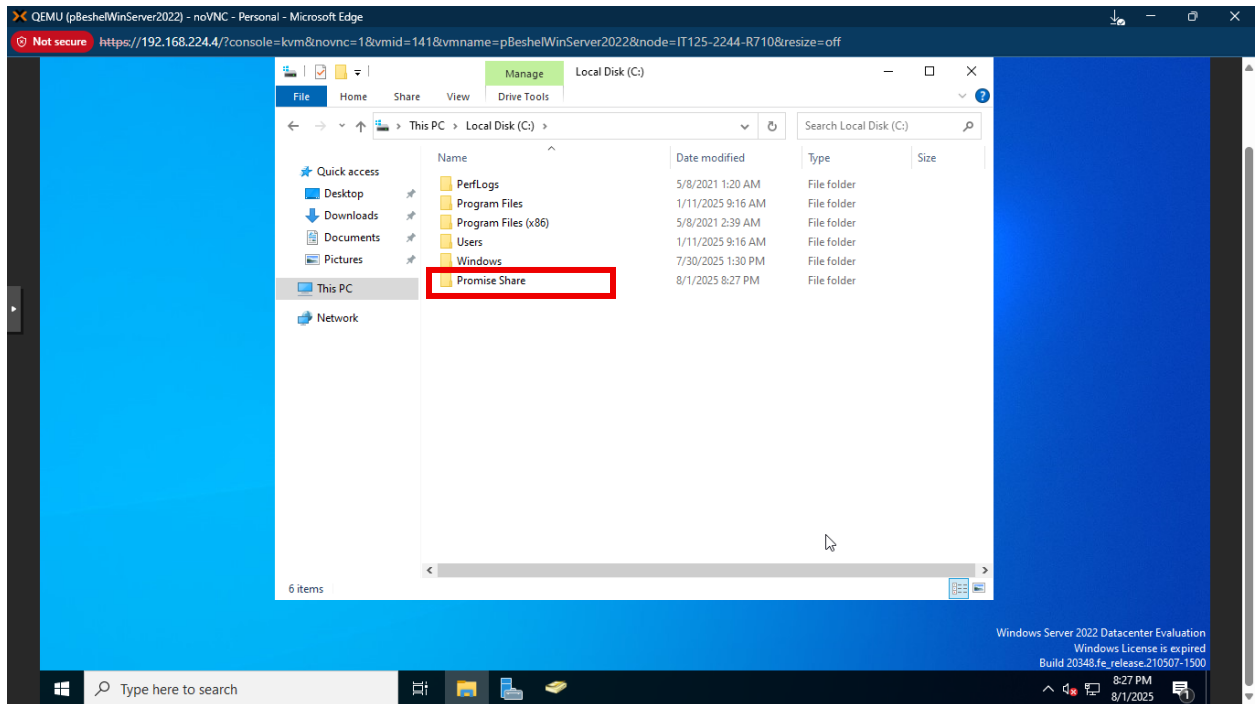

- c. **[fname] Sales Users** OU showing **[fname] Sales** Security Group and **[fname] Salesbody** User. Ensure **[fname] Salesbody** is a member of the **[fname] Sales** Group.

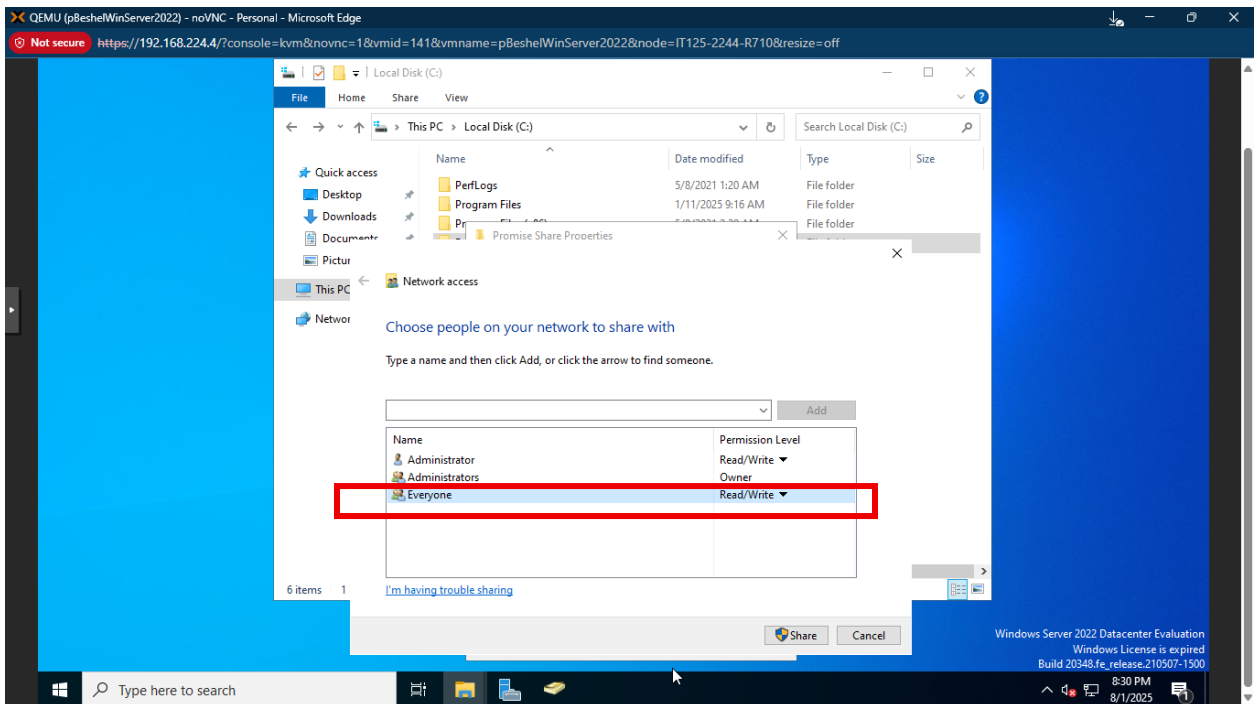

Paste screenshot here:

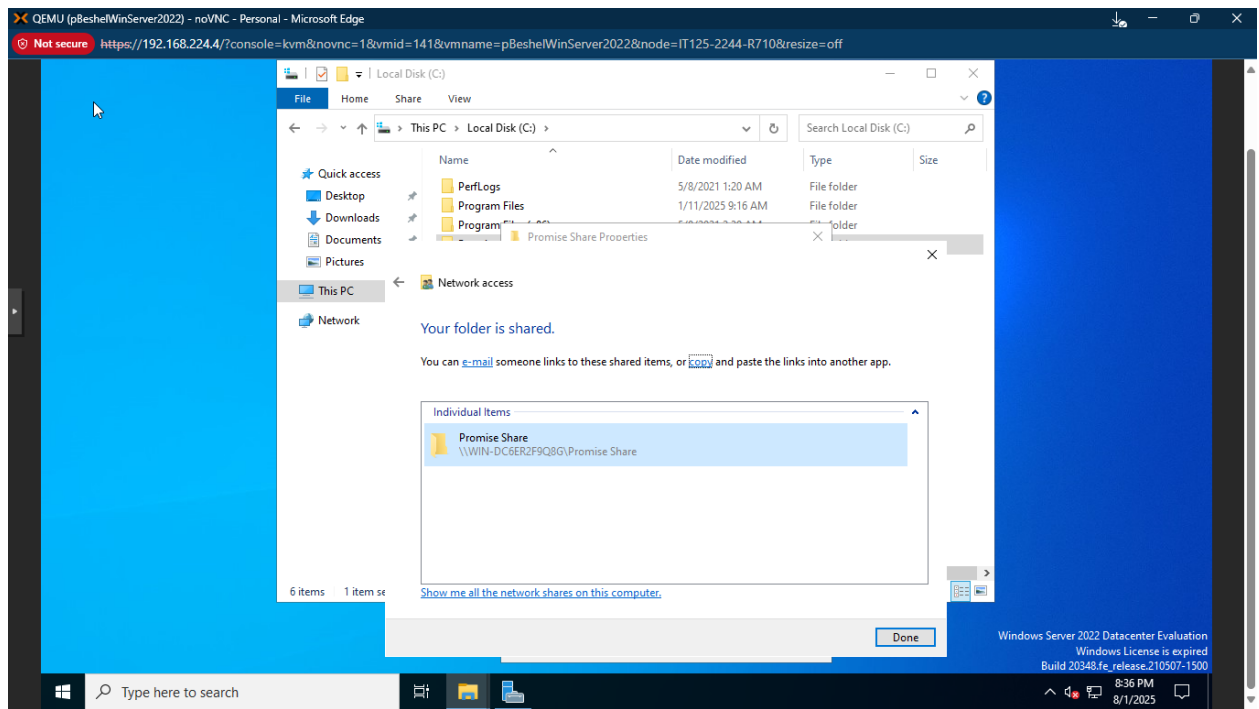

3. On the C: drive of your Server 2022 Virtual Machine, create a folder named **[fname] Share**.

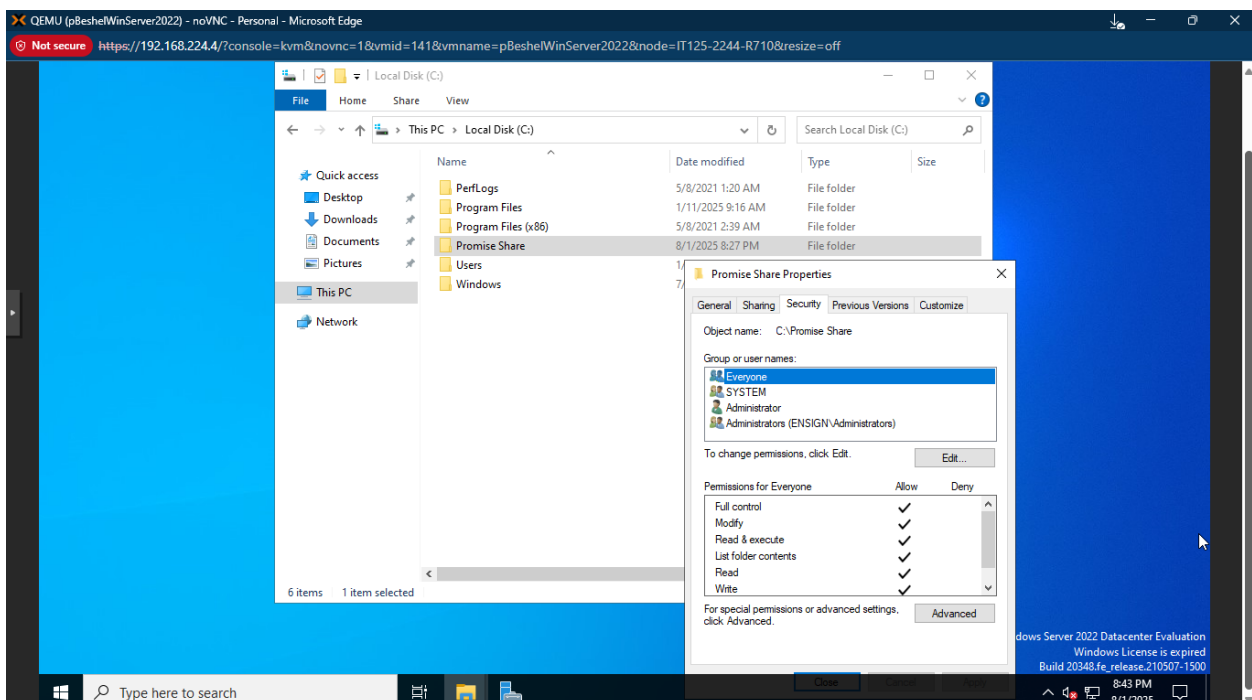

- a. Share the folder with Everyone with Read/Write permissions.

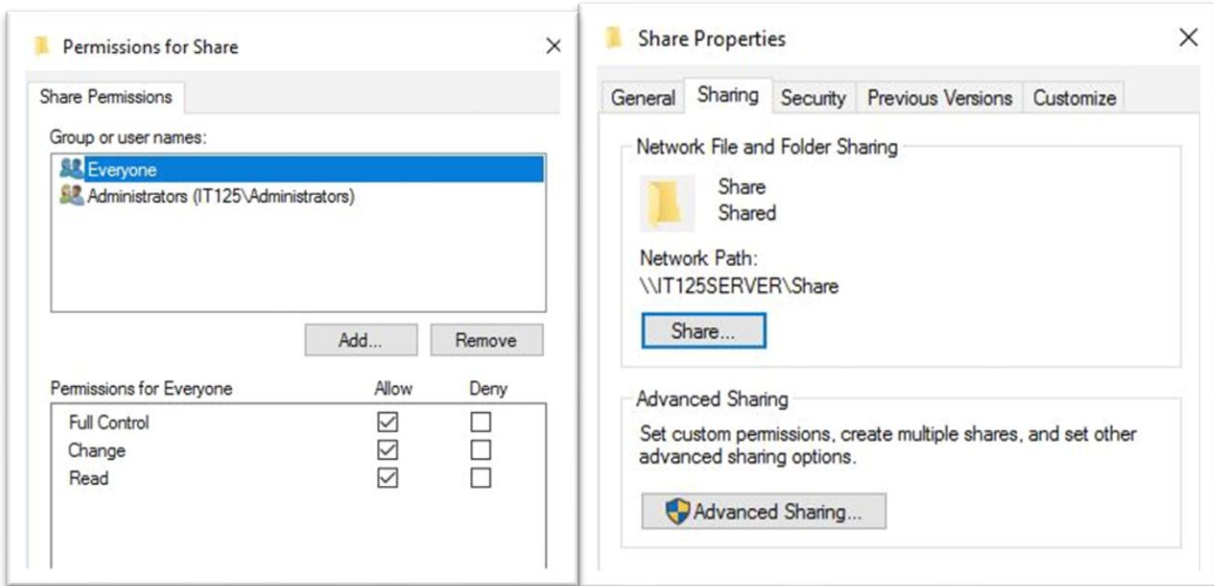

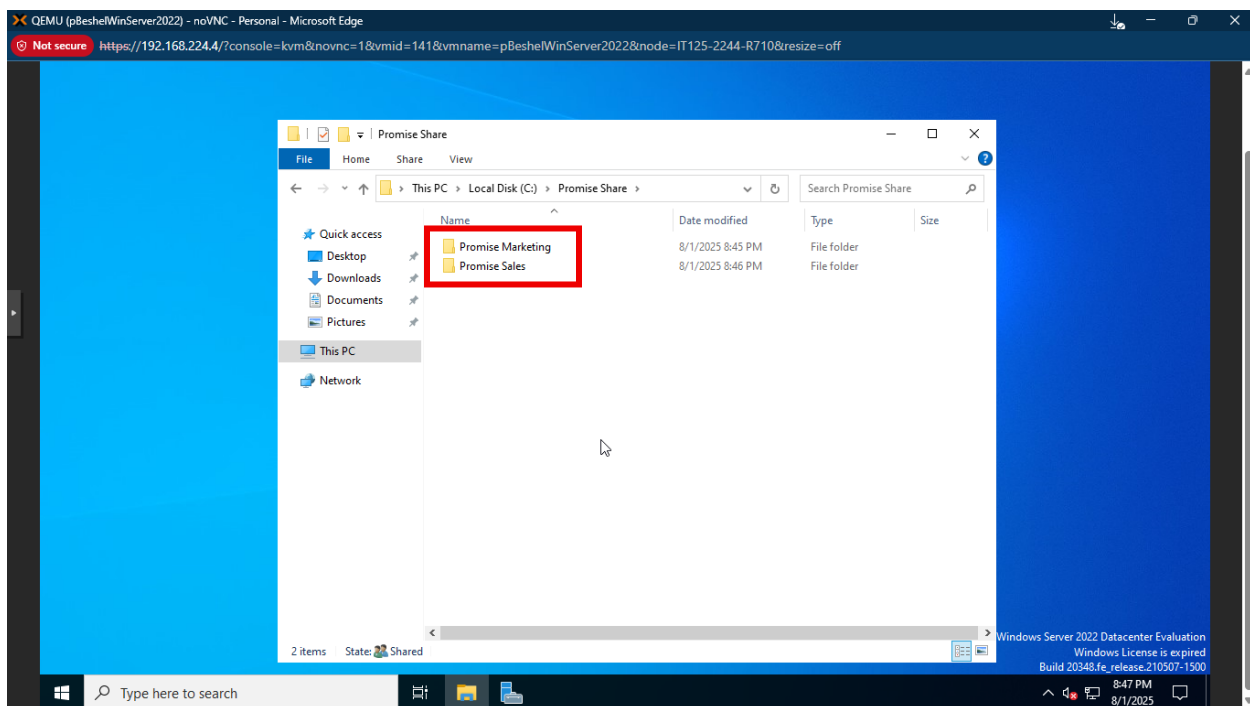

b. Make note of the Network Path of the **Share** folder:

\\WIN-DC6ER2F9Q8G\Promise Share

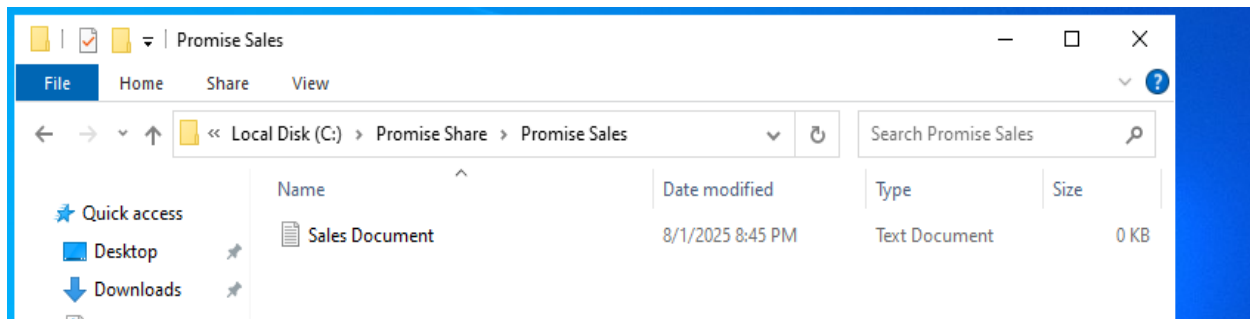

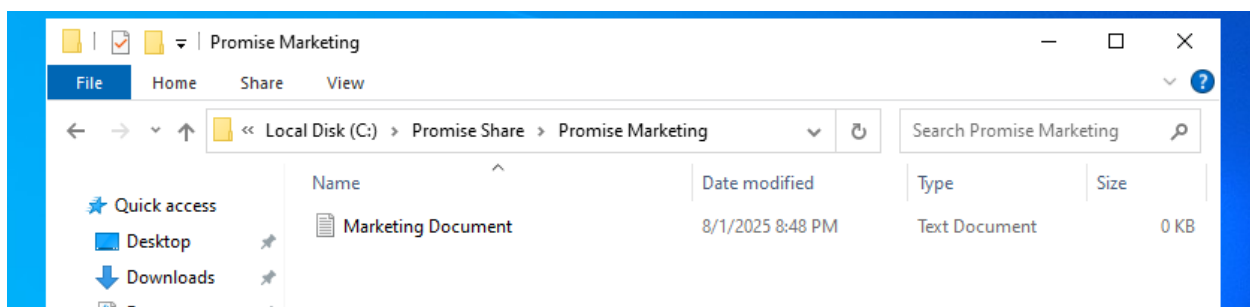

4. Within the **[fname] Share** folder, create **[fname] Sales** and **[fname] Marketing** folders.

- a. In the **[fname] Sales** folder, create a text file named **Sales Document**.

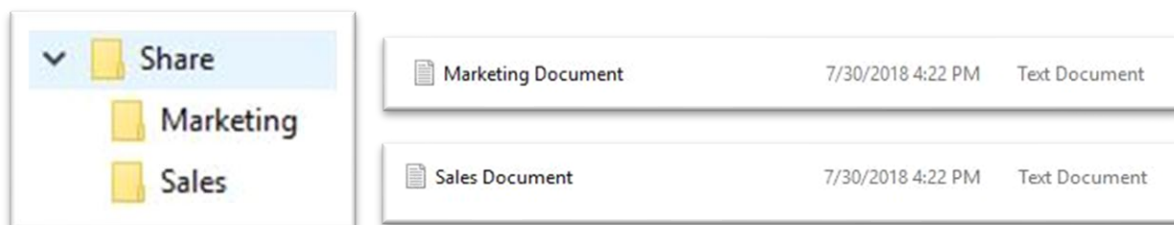

- b. In the **[fname] Marketing** folder create a text file names **Marketing Document**.

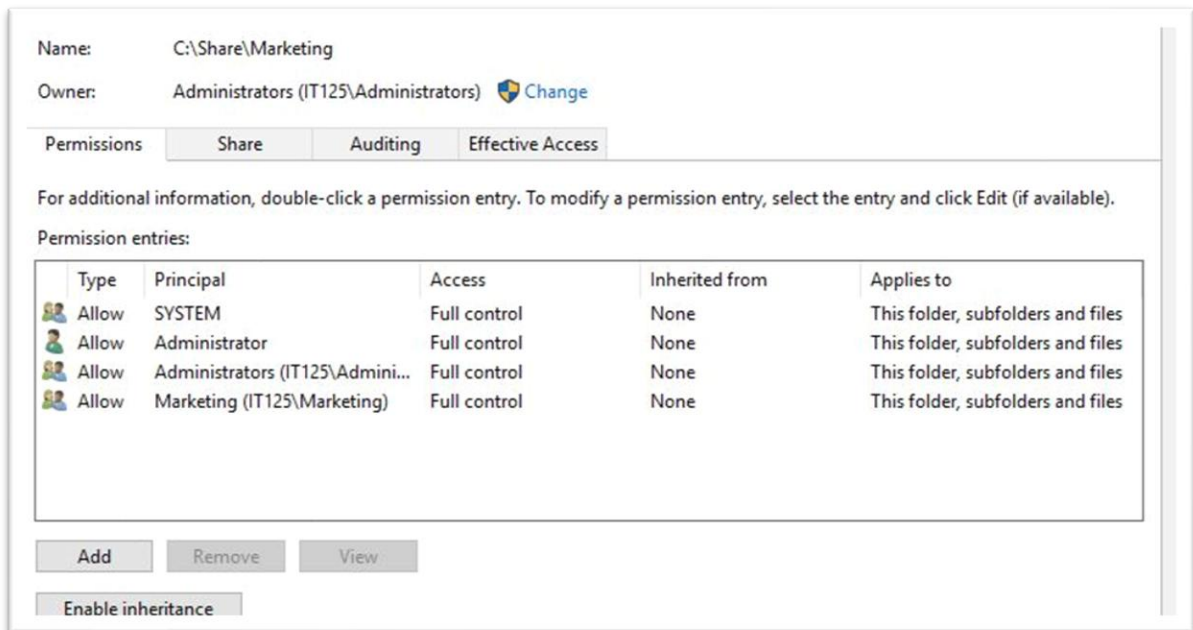

c.

- d. You will not need to set share permissions as they will inherit the permissions from the parent folder.

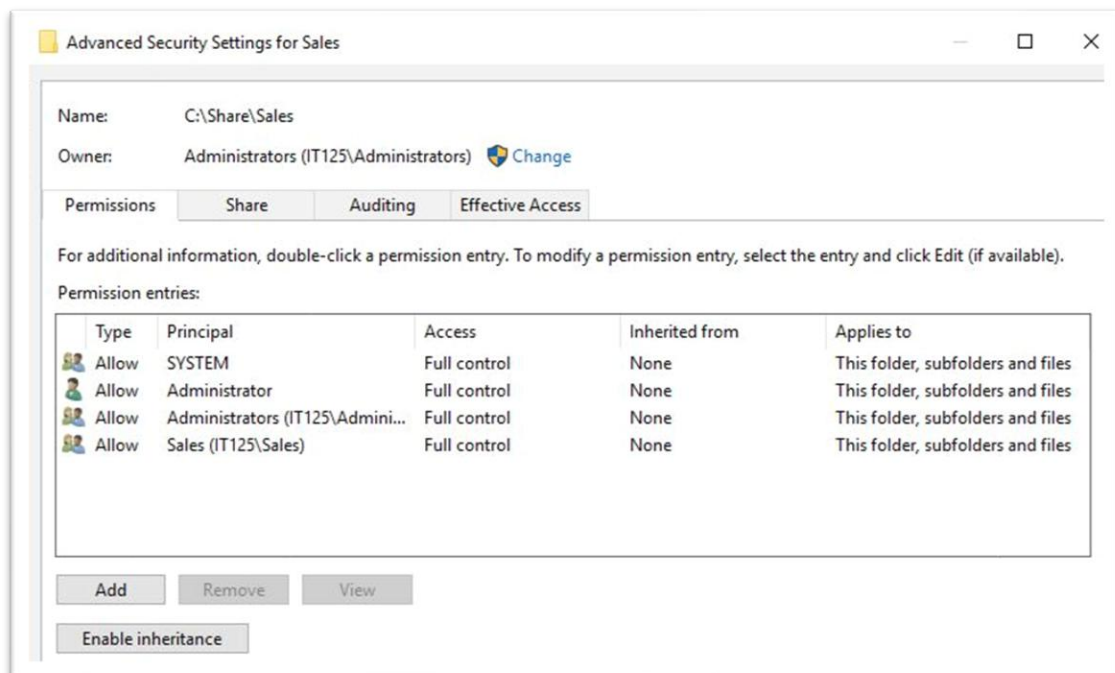

5. You should have learned how to access shared files in previous projects. If you have forgotten how, please refer to earlier projects or research online how to accomplish this.
6. Switch over to your Windows 11 machine and log in as **[fname]Marketer**. You should be able to access both of the documents.
7. Switch back to the Server 2022 VM.
 - a. Edit the security setting of the **[fname] Marketing** folder.
 - b. Disable inheritance and convert inherited permissions to explicit permissions.
 - c. Remove the Everyone group.

- d. Add the **[fname] Marketing** security group and grant Full Control.

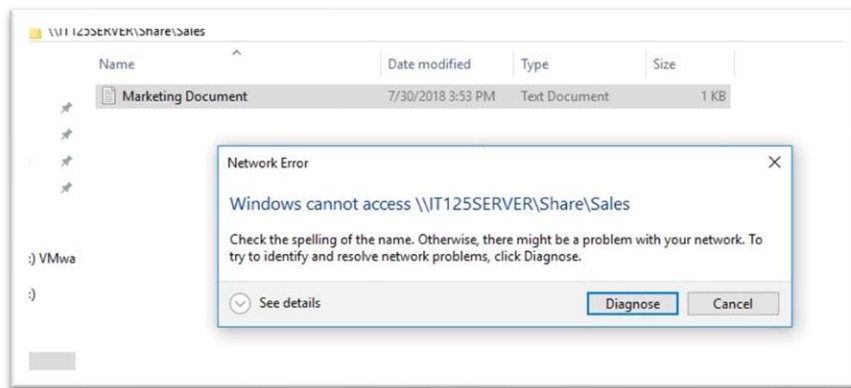

8. Edit the security setting of the **[fname] Sales** folder.
- a. Disable inheritance and convert inherited permissions to explicit permissions.
 - b. Remove the Everyone group.
 - c. Add the **[fname] Sales** security group and grant Full Control.

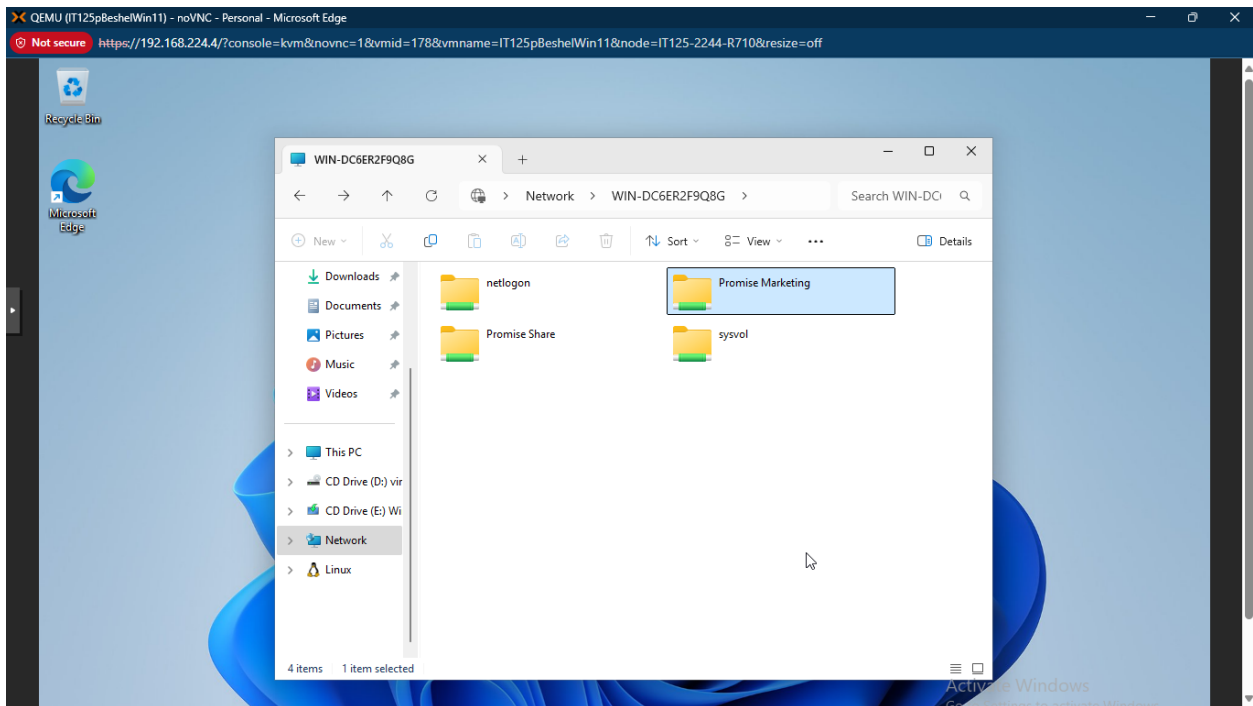

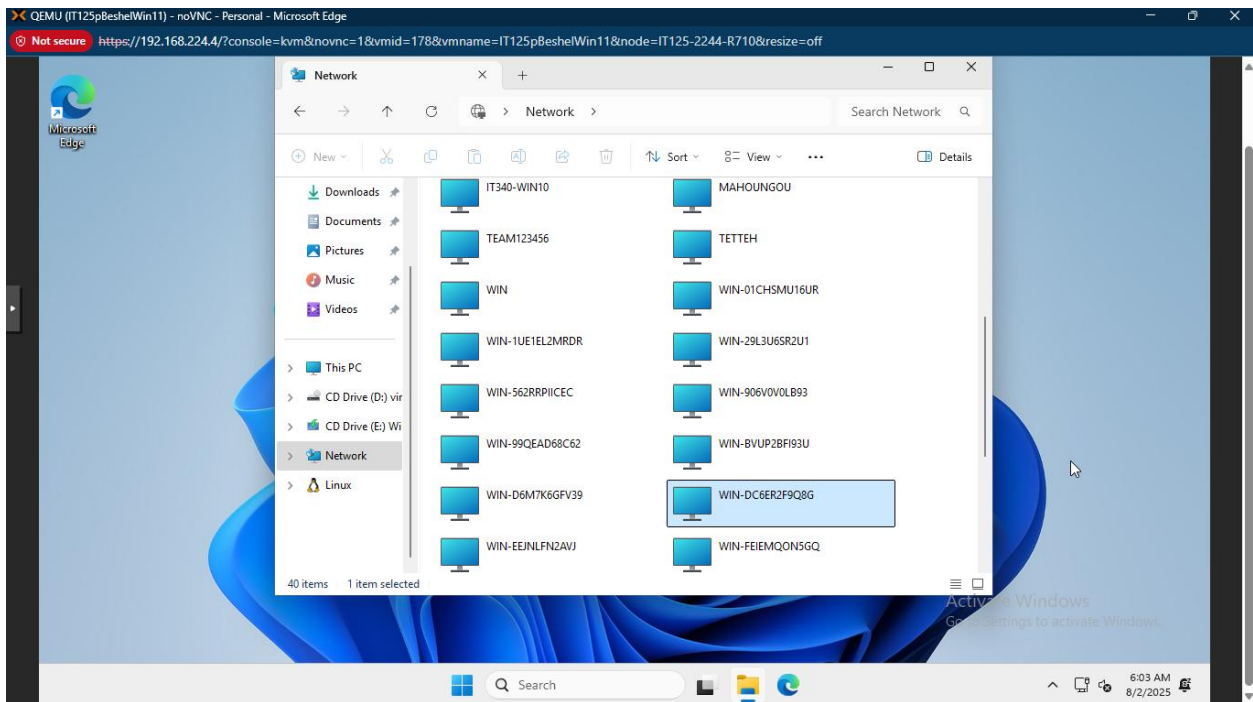

9. Switch back to the Windows 11 VM.

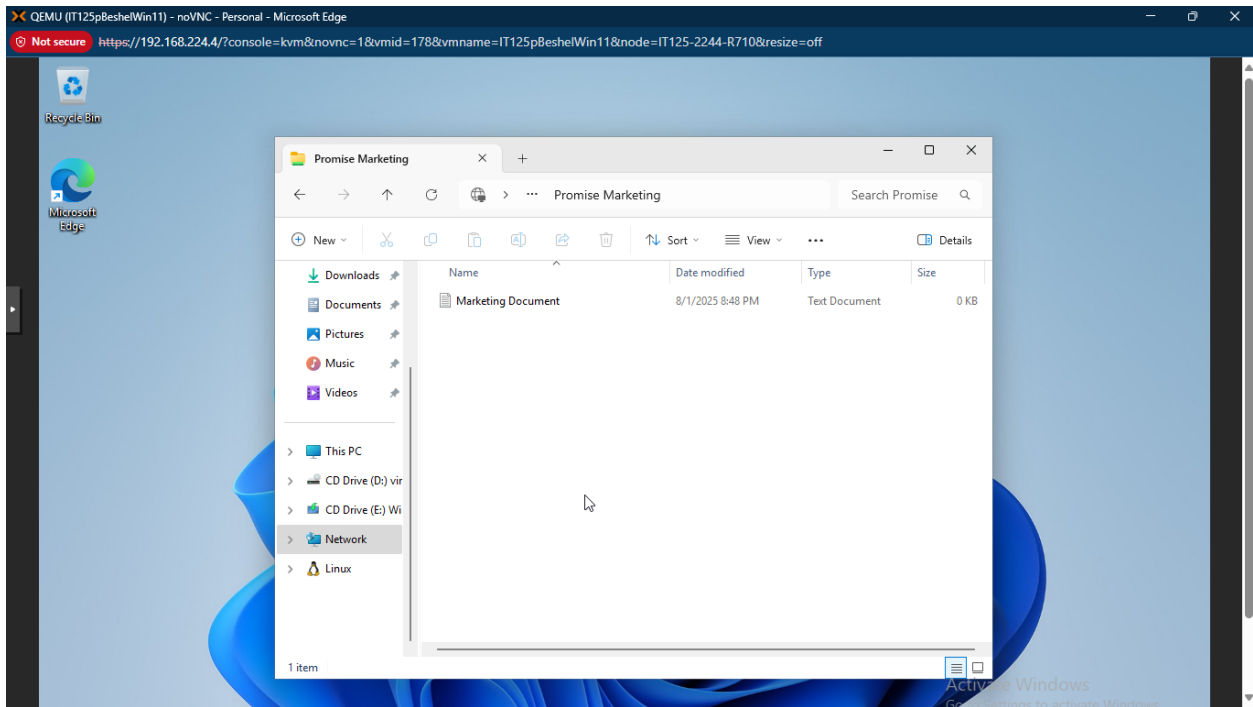

- a. Attempt to access the **[fname] Marketing** folder as before. You should be successful.
- b. Attempt to access the **[fname] Sales** folder. You should get the following error:

You may only see the **[fname] Marketing** folder. **Take a screenshot showing [fname] accessing the [fname] Marketing folder.**

Paste screenshot here:

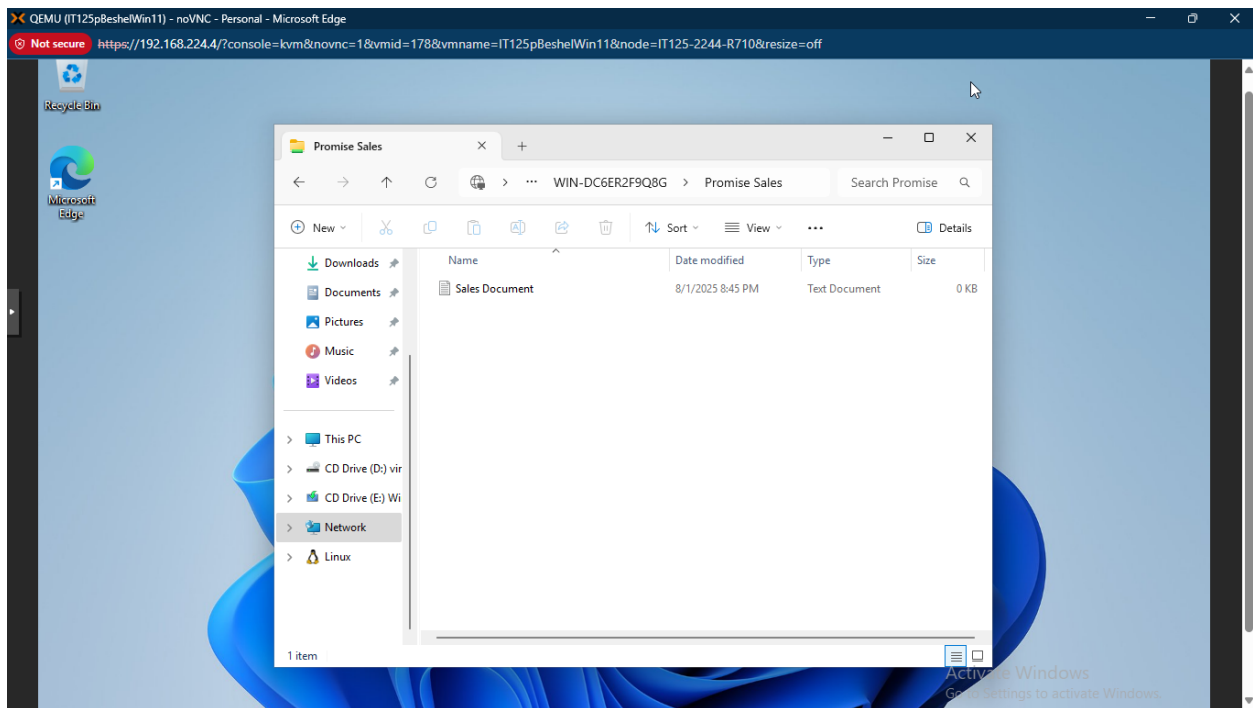

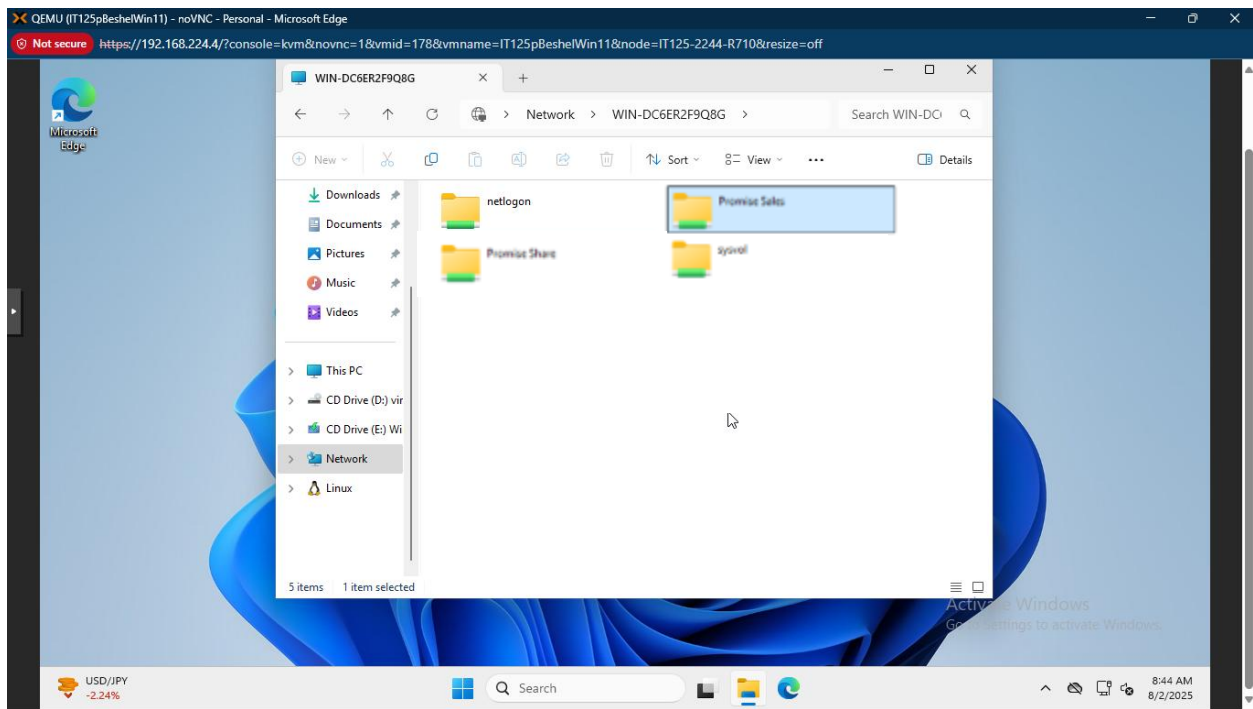

10. Switch user to **[fname] Salesbody**.

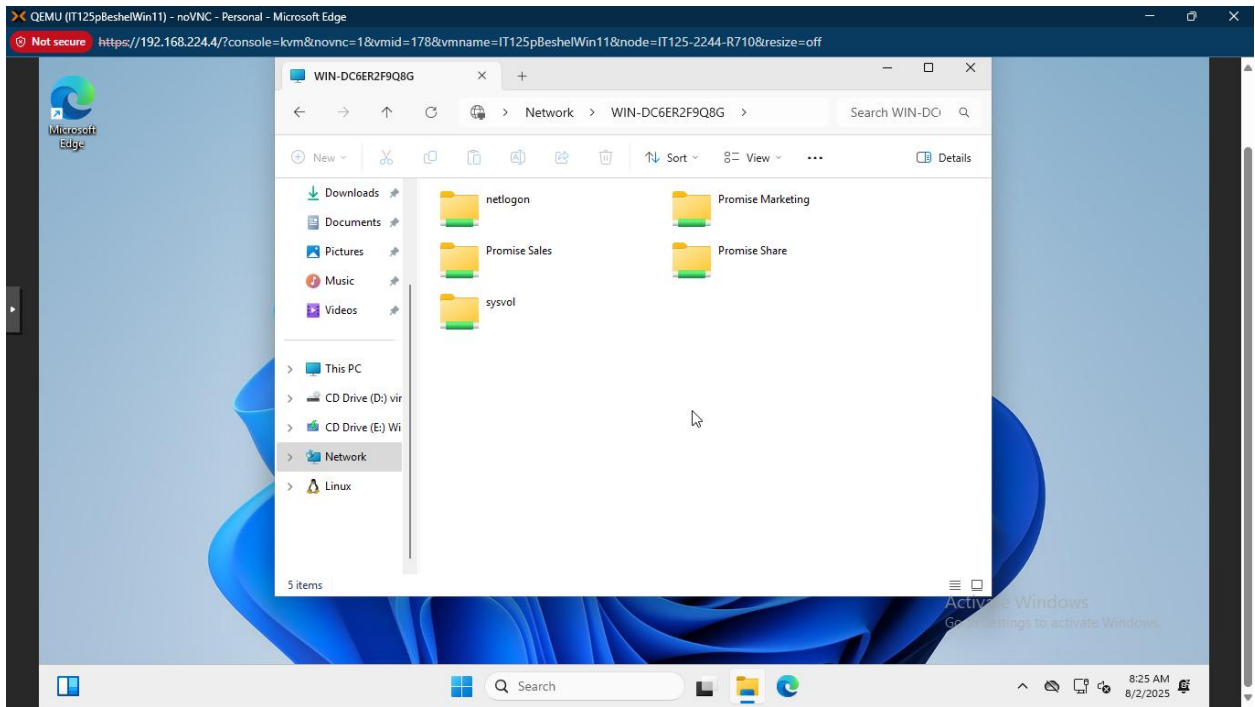

- a. Attempt to access the **[fname] Sales** folder. You should be successful. You should not even see the **[fname] Marketing** folder.

- b. Take a screenshot of **[fname] Salesbody** attempting to access the **[fname] Sales** folder.

Paste screenshot here:

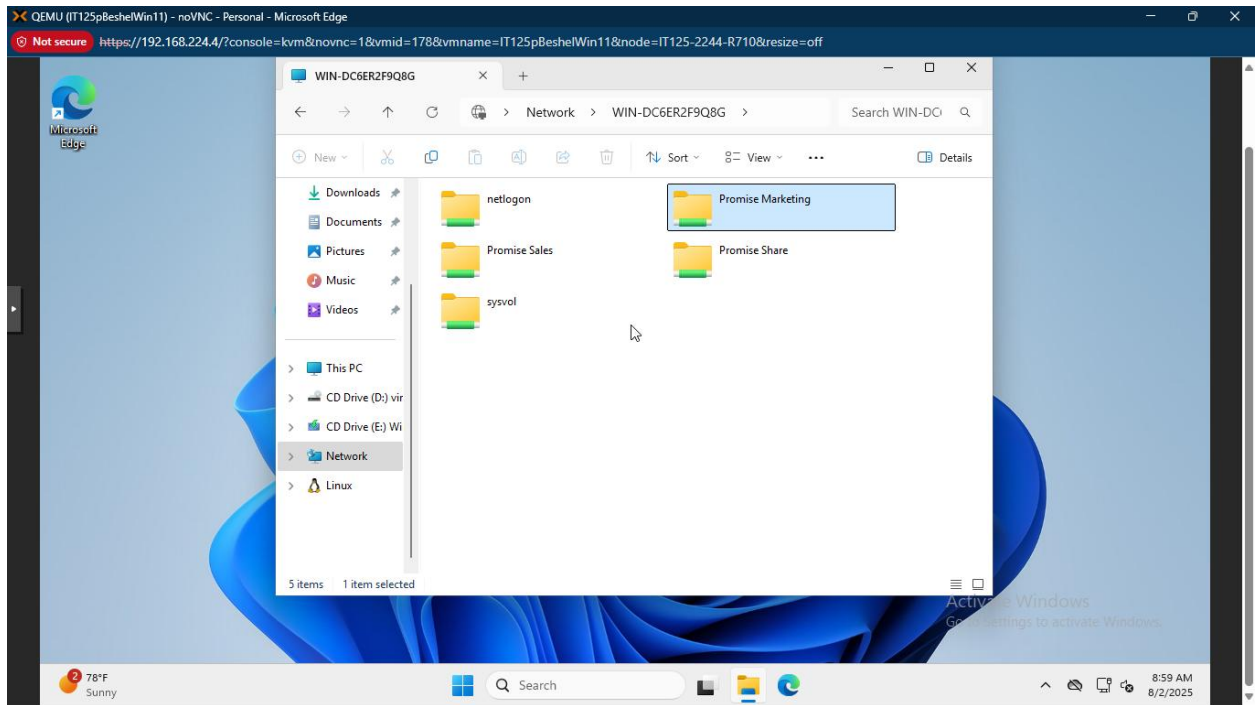

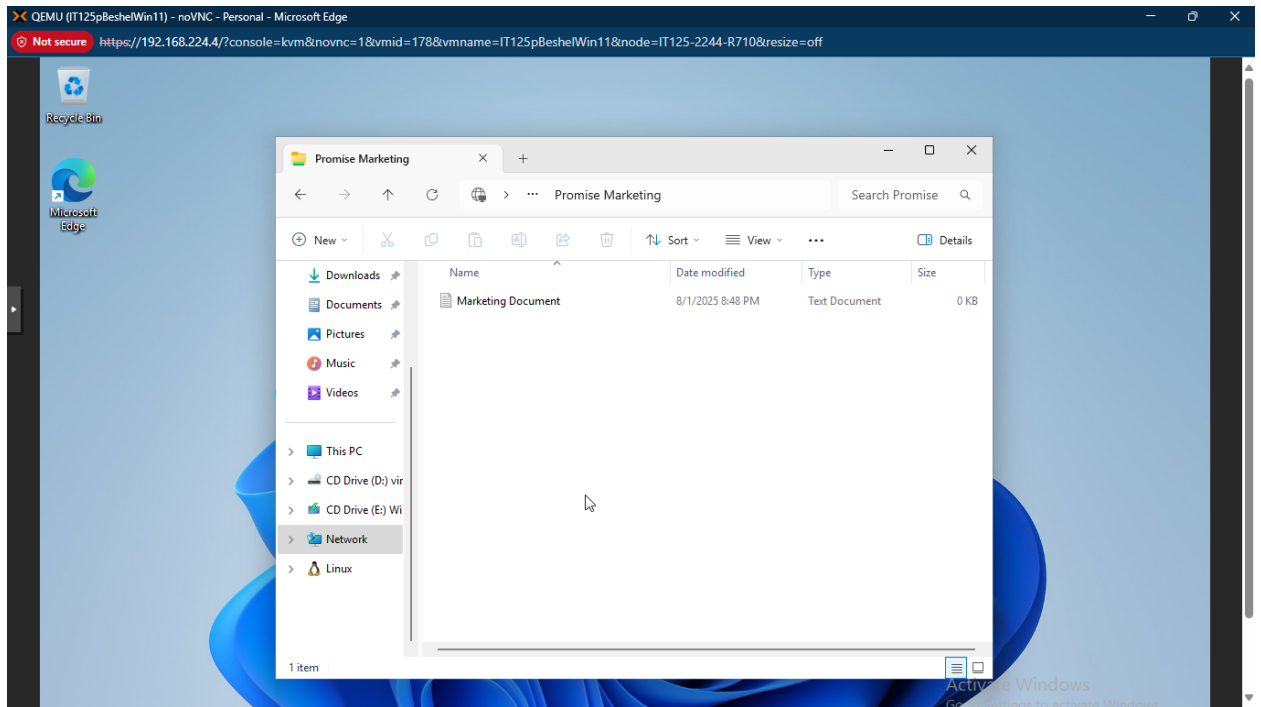

11. Switch user to **[fname] Boss**. This user should be able to access both folders and documents. **Take the following screenshots:**

a. [fname] Boss attempting to access [fname] Marketing folder.

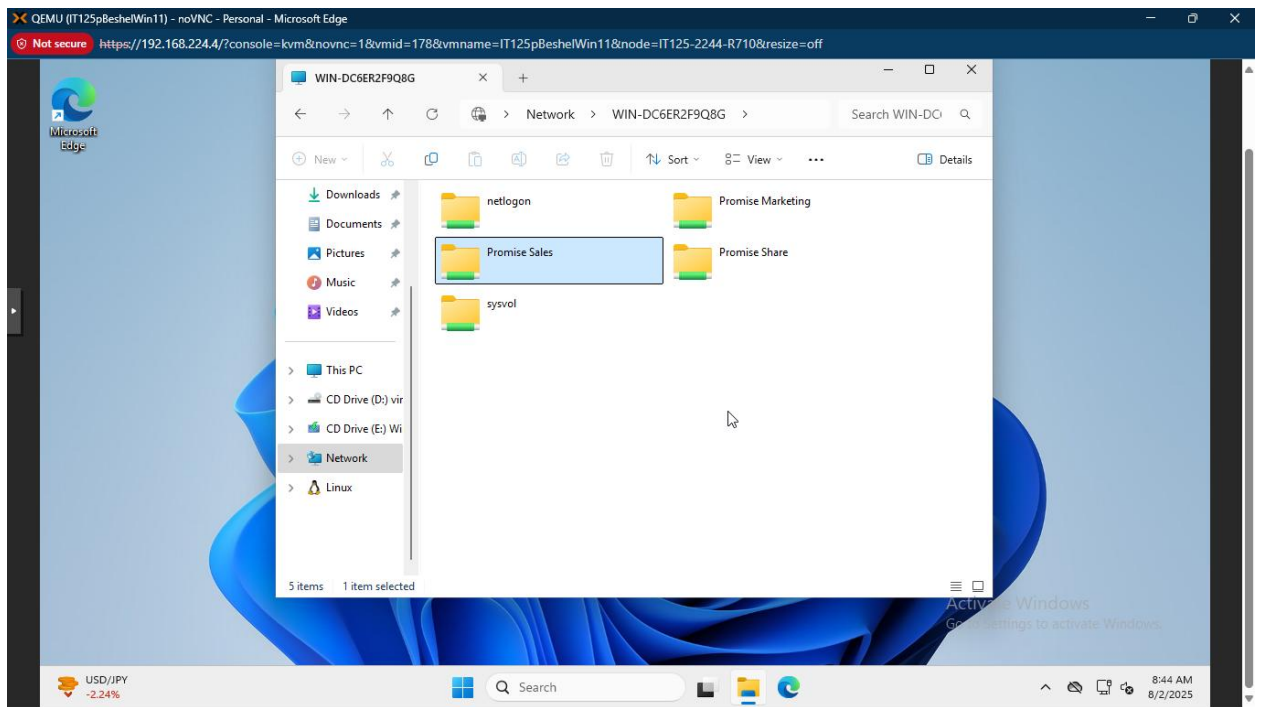

Paste screenshot here:

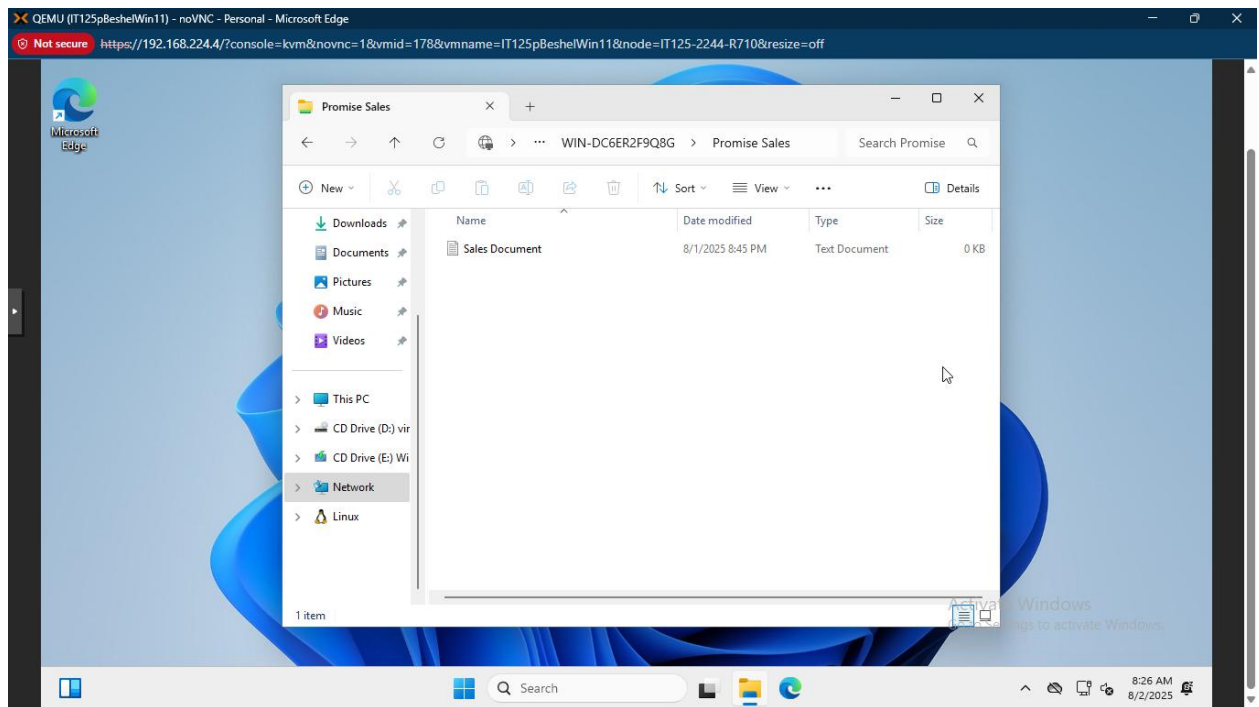

b. [fname] Boss attempting to access [fname] Sales folder.

Paste screenshot here:

12. Submit this completed worksheet in Canvas for assignment credit, including the 7 required screenshots in steps 2, 9, 10, and 11.
